

Albatroz Engenharia secures Design Organisation Approval from EASA

Albatroz Engenharia is delighted to announce that has successfully concluded an EASA certification and had received a Design Organisation Approval (DOA) status.

Lisbon, January 20th, 2017 - After demonstrate accomplishment of all the relevant requirements during the certification process, the European Aviation Safety Agency (EASA) granted Albatroz Engenharia with the DOA status.

Under the DOA certificate (EASA 21J.400), Albatroz Engenharia is authorised to perform “minor” design changes to large and small rotorcraft related to installation of role equipment, including air flight manuals, structural (cabin and airframe) and electrical system changes under applicable European regulations. For any changes that are classified as “minor”, Albatroz Engenharia can provide a direct approval.

As part of this certification approval, Albatroz Engenharia had to demonstrate the company’s capabilities, conduct specific staff training and identify the key internal roles and responsibilities, making Albatroz Engenharia a reliance partner to help its customers in the “minor” design changes scope.

###

About Albatroz Engenharia:

Albatroz Engenharia is a Portuguese company founded in 2006. Dedicated to R&D and innovation activities it creates customised solutions in robotics, software and aeronautics. The company has been working closely with its customers to provide innovative and cost effective solutions applied to the inspection and maintenance of overhead power lines.
